Five Critical Considerations for WAN

Connect and Secure Your WAN with Cisco ONE™ for WAN

Serve up your most important applications faster.

Keep branch security high while keeping bandwidth costs low.

Integrate voice and video at your branches to increase productivity.

10% Lower TCO over 6 years with Cisco ONE for WAN[1]

CISCO ONE FOR WAN

## How can I make the most out of my WAN investment?
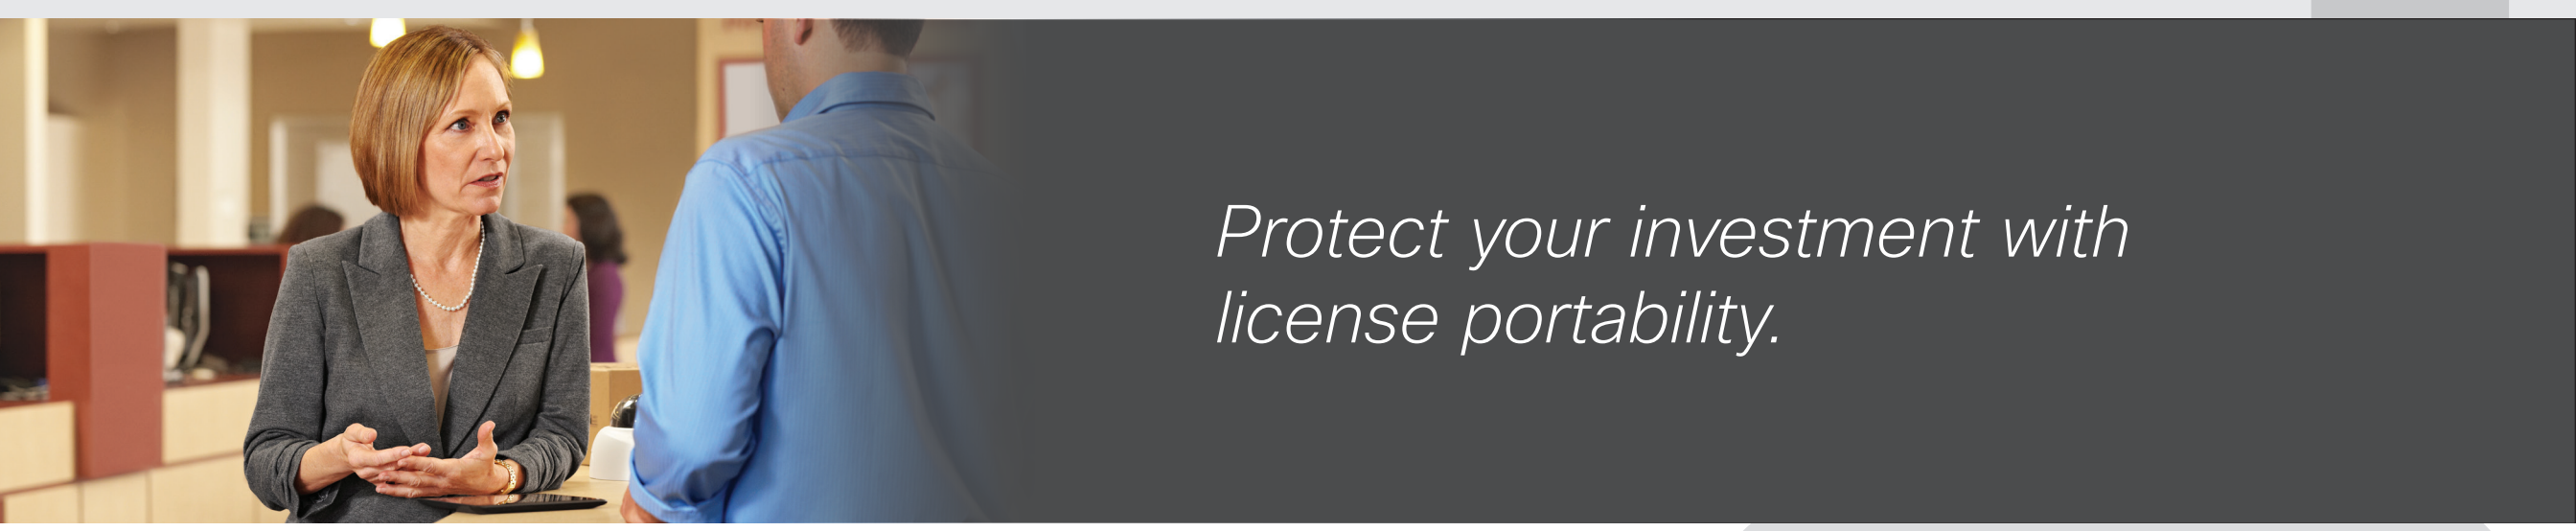

Cisco ONE for WAN provides:

- A complete solution that delivers an optimal experience over any connection
- Secure, fault-tolerant connectivity for your branch and edge networks
- Two flexible software feature sets that address your specific WAN needs

---

Protect your investment with license portability.

CISCO ONE FOUNDATION FOR WAN

How can I keep up with the increased demand for bandwidth on my WAN?
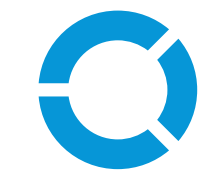

Cisco ONE Foundation for WAN allows you to:

- Deploy Cisco® Intelligent WAN to accelerate cloud services deployment to all remote sites
- Ensure a high-quality user experience by prioritizing and optimizing critical latency-sensitive applications
- Automate application deployment with centralized policies and distributed enforcement

---

CISCO ONE FOUNDATION FOR WAN

What's the best way to connect my branches and campus securely at a low cost?

Cisco ONE Foundation for WAN enables you to:

- Improve performance with application protocol acceleration and optimization techniques that offload the WAN
- Reduce WAN bandwidth expenses and optimize bandwidth usage by choosing the best path for critical applications
- Realize cost savings with tools and services that measure and manage the energy use of devices

---

Better manage the energy use of connected devices and decrease your energy costs by up to 35%.

CISCO ONE WAN COLLABORATION

What if I want to integrate voice and video across branches and campus to increase productivity?

Cisco ONE WAN Collaboration allows you to:

- Expand highly available unified communications across your branches and beyond
- Extend rich media capabilities with secure video
- Stay secure with encryption and VPN support

CISCO ONE WAN COLLABORATION

How can I get advanced capabilities to my remote branch locations?

Cisco ONE WAN Collaboration enables remote branch facilities to:

- Improve the reliability of branch and cloud telephony
- Easily migrate from TDM to SIP trunking
