

5 Reasons to move to the cloud

1 Security is paramount.

The Cloud is always alert, constant vigilance. One less problem for you.

2 Lighter, Faster.

Your devices will only have a multi-platform cloud monitoring agent which is super-light.

3 Everything centralized means Freedom.

The Cloud is everywhere, true mobility. You will have a single, centralized console to manage all your devices wherever they are.

4 Always up to date.

Forget about downloading updates time and time again, everything will be updated automatically every 6 seconds.

5 More reasonable, more efficient.

Focus on your work, don't worry about managing servers or additional software. No technological risks for you or surprises and no hardware costs.
