

Share your ideas seamlessly with Intel® Pro WiDi

Don't let cables or adapters hold up your meeting. With Intel Pro WiDi, we could share screens to an external display quickly and easily using Dell™ vPro™-enabled business devices and an Actiontec® ScreenBeam® Pro.*

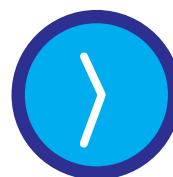

Lose the cables

Connecting without the hassle of cables and adapters was easy.

Share securely

Users shared only what they intended to, with no need to use the company's wireless network.

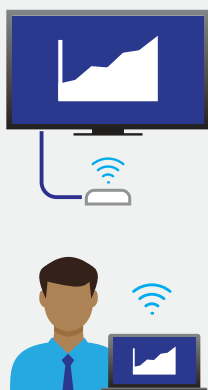

Wait less

Connecting took up to one-third less time, and taking turns required only a few clicks.

Flexible presentation modes

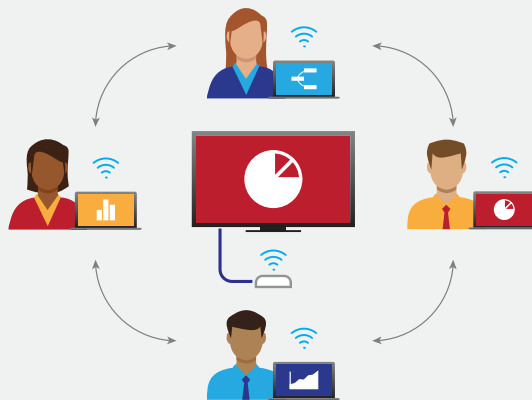

Exclusive mode

One user presents with exclusive access.

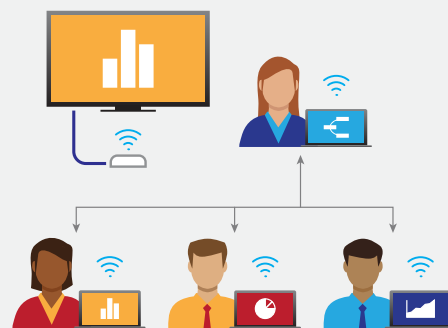

Interactive mode

Multiple users share control of the display.

Moderated mode

One user controls who presents to the display.

All three modes were faster and simpler with WiDi.
