

# GOING THE DISTANCE WITH INTEL® SERVER PRODUCTS

We make the path to reliable solutions easy with focused building blocks, solutions and validation/engineering as a service.

Intel offers you the edge to set your business apart from the competition. With focused products designed to span multiple use cases and customization requirements, you can evolve and expand your business as you exceed customer expectations.

Built to take advantage of the Intel® Xeon® E5-2600 product family, our feature-rich products provide performance, density, power, and cost flexibility to grow with your customer. These high quality, server building block solutions feature Intel's most innovative technologies with Intel world-class validation, compatibility, certification, warranty and support.

- Solutions carefully designed to help solve real customer issues
- The best possible fit and function of all Intel solution components
- Opportunities to achieve significant cost savings via bundled product offerings

***"We keep going back to Intel because of that constant quality we get compared to other vendors."***

**– Austin Hipes**

## Differentiate your business with Intel® Server Products

**Confidence & Trust.** Intel Server Products offer best-in-class design and uncompromising quality standards. Extensive testing and validation means performance you can rely on.

- Manufacturing rigor
- Lifecycle management
- Rigorous product testing & certification
- Longer life options available on select products

**Commitment & Continuous Improvement.** We are committed to providing you an extraordinary customer experience. We listen and adapt based on our channel partner's needs. We deliver the pre-validated server solutions, extended warranty options, support, and software to give you the Intel server edge.

- 24/7 support
- Access to experts
- Attentive & responsive
- Pass-through certifications
- Intel brand & investment
