HPE ProLiant Easy Connect
Managed Hybrid Servers

Get simple, scalable hybrid IT with a managed services model for ease of ownership and budget predictability

Making IT easy
Hewlett Packard Enterprise can help you deliver the advanced capabilities your users expect, with a hybrid IT solution built just for education with one or more sites.

Part of the HPE Just Right IT portfolio
HPE Just Right IT helps small and midsized businesses achieve your business goals with simple, reliable, and affordable products, solutions, and services.

Your cloud, your way

As a modern educational establishment, you need to be able to adopt new technologies that cater to the needs and expectations of students and faculty alike. This includes supporting advanced capabilities for collaboration, assessment, and connectivity and media. But outdated infrastructure, decreasing budgets, and a lack of IT skills may be holding you back from your full potential.

You can accelerate your adoption of leading education technologies with HPE ProLiant Easy Connect Managed Hybrid Servers. They provide the flexibility and scalability of the cloud with the security of on-premises IT.

Combine the power of the cloud with on-premises security
The unique design of the HPE ProLiant Easy Connect Managed Hybrid Servers feature tightly integrated compute, storage, and networking, together with Zynstra virtualization and cloud management software and is delivered as a managed service. They are deployed onsite and come integrated with cloud services and remote management from the cloud.

Designed with the needs of educational establishments in mind, this solution features simple deployment and ease of management—all in a convenient subscription model for a predictable monthly fee.

Treat all of your campuses equally

If you are supporting IT for more than one campus or location, you know the challenges of delivering IT to multiple sites:

- Too much physical infrastructure
- Inconsistent systems
- Poor service levels
- Time- and resource-intensive management

The HPE Managed Hybrid Servers deliver the same level of service and security everywhere you need it—on an IT infrastructure that can be managed remotely to minimize costs and maximize availability.

Enterprise-grade IT for one or more campuses

The HPE ProLiant Easy Connect Managed Hybrid Servers, together with Zynstra's unique virtualization and cloud management software, deliver enterprise-class functionality for one or more campuses or locations.

Hybrid IT: The best of both worlds

This solution gives you secure cloud enablement on your own terms. You choose which data and applications you keep onsite and which you put in the cloud. We take care of the rest.

IT-as-a-Service payment model

A pay-as-you-go subscription model means you pay a predictable monthly fee, giving you greater budget flexibility. And your on-premises hybrid cloud is kept current and maintained 24x7 with no need for manual patching or updates. This helps reduce server administration by more than 90 percent.[1]

Simple deployment

The HPE ProLiant Easy Connect Managed Hybrid Server come in a unique design, unlike anything you have ever seen. It can even be mounted on your wall. The flexibility of the solution reduces your hardware footprint along with the complexity of on-premises IT. What's more, all of your core IT is staged on the server before it arrives so it's easy to buy, use, and manage. The staged hardware, software, and services can help you achieve total cost of ownership savings of up to 60 percent compared to a traditional IT server infrastructure.[2]
