BUSINESSES NEED BUSINESS PCs

Choosing the best PC is simple with Intel® processors

Which is better for your business: consumer PCs with Windows* 8.1 Home or business PCs? Business PCs with Intel® processors offer features that boost productivity and enable cost savings. Plus, choose Intel® vPro™ Technology for added capabilities that go above and beyond.

Consumer PCs:

33% HIGHER COST[1]

10 MINUTES to repair remotely[2]

### Do Consumer PCs Really Save Money?

Businesses take on additional costs when they shoehorn consumer PCs into the IT infrastructure. Consumer PCs are missing key functionalities, such as the ability to connect to corporate domains with Windows* 8.1/10 Pro.

Business PCs Minimize User Downtime

Intel® Active Management Technology enables IT admins to remotely access and repair compromised PCs. The result? User downtime drops from an average of 8 hours to 10 minutes.[2] That's time better spent working than waiting.
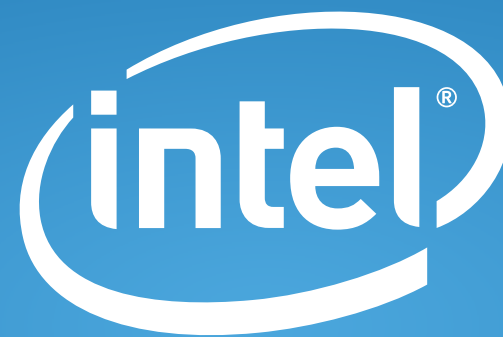

What Capabilities Does Your Business Need?

	Consumer PC	Business PC
Warranty & Support[3]	1-year limited	3-year with onsite support
Chassis	Standard materials	Rugged materials, keyboards and hinges thoroughly tested
Manageability	None	Intel® vPro™ Technology
Monitor	Single	Multiple monitor support
Ports	USB, HDMI*, Audio	USB, HDMI*/eDP, RJ45, VGA
Operating System	Windows* 8.1 Home	Windows* 8.1/10 Pro

intel inside™ CORE™ i5 vPro™

intel inside™ CORE™ i7 vPro™

intel inside™ CORE™ m vPro™

Consumer PCs can't cut it in the workplace. They're expensive to manage and have limited functionality without Windows* 8.1/10 Pro desktop applications. Discover a better way to work with business-ready PCs and Intel® vPro™ technology.
