

# TOUCH ALL-IN-ONE PCs FOR BUSINESS

## The Power of Touch

Touchscreens have revolutionized how we interact with devices

### Immediate

Humans instinctively want to manipulate things by touch

### Engaging

Touch computing makes work seem more like play

### Ergonomic

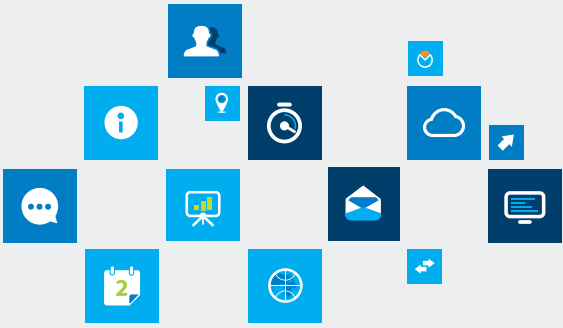

Naturally shifting between input modes keeps users comfortable

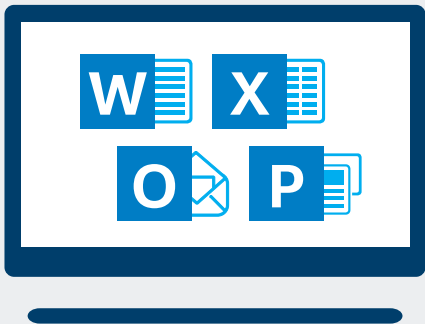

### Collaborative

Touch devices allow people to work together in a more natural way

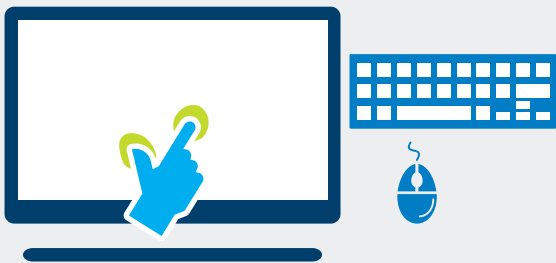

## Touch and the Modern Workplace

Thousands of today's popular business apps are touch-enabled

Key business applications are optimized for touchscreen controls

All-in-One PCs offer touch along with other inputs

## Touch Greater Productivity

### Collaboration

Brainstorm better with touch for drawing and marking up

### Point-of-Sale

Touch-enabled All-in-One PCs modernize the store checkout

### Simplified Workspaces

All-in-One PCs put PC performance and touch in space-saving designs

### Design

Quick sketches, diagrams, and more are simpler with touch

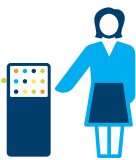

### Style Upgrade

Sleek All-in-Ones with touch present a clean, stylish look

### Customer Kiosks

Touchscreen All-in-Ones are ideal for self-service info and sales stations

## Intel® processor-based All-in-One PCs with touch deliver business-grade performance

Keyboard and mouse for creating, writing, and inputting info

Multitasking performance for the demands of today's workplace

Touch for accessing, collaborating, sharing, and marking up

A mere 1 min./day productivity boost will pay back the additional cost of an All-in-One PC with touch in **20 months**<sup>1</sup>
