

# PANDA CLOUDFUSION

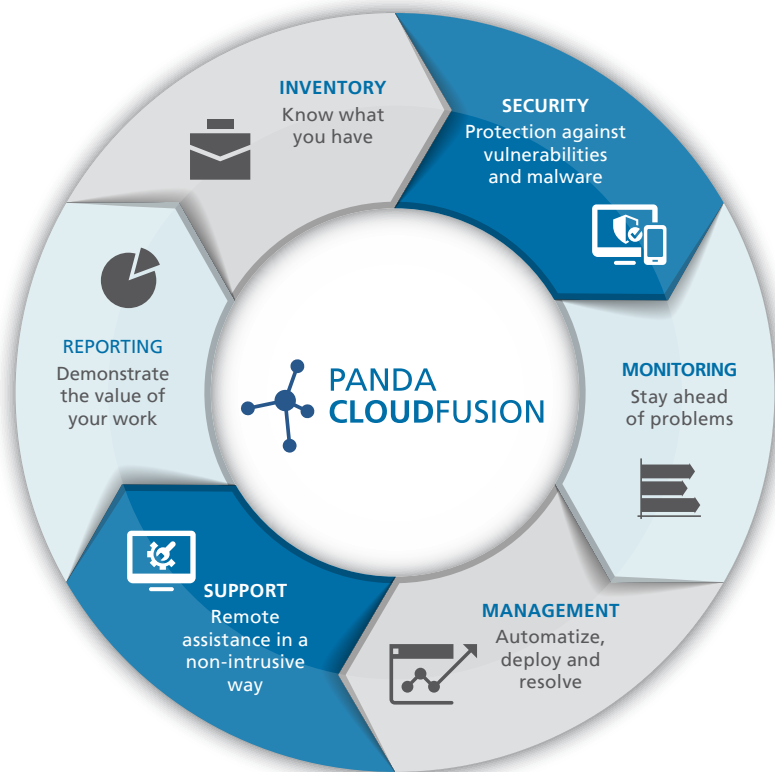

Security, Management and Support from the Cloud

## Do you need to manage all aspects of your IT infrastructure, plus your security, simply and centrally?

Panda Security presents Cloud Fusion, a complete product capable of protecting, managing and remotely supporting all devices on your IT network, including smartphones and tablets.

**PANDA CLOUD FUSION** is a cloud-based solution that meets all your needs, and is easy to deploy and scale as it doesn't require maintenance or infrastructure investment. Available anytime, anywhere through a simple Web browser, the solution will allow you to:

- **Enjoy maximum protection against malware** thanks to Collective Intelligence.
- **Reduce costs** through optimization of your IT infrastructure.
- Provide **the best possible support experience** to end users wherever they are.

### Maximum security

Security for all devices whether in the office or on the road, 24 hours a day, 365 days a year.

- Maximum **detection of threats**, malware that exploits zero-day vulnerabilities and spam thanks to **Collective Intelligence**.
- **Reduce the number of vulnerabilities** keeping all your software up to date.

### Proactive maintenance and support

Manage incidents and resolve problems quickly with minimal impact on end users.

- **Remotely monitor and support all devices non-intrusively** even if they are switched off or out of the office.
- **Organize, classify and prioritize incidents**, sharing documentation and technical procedures.

### Centralized management and control

Exact and up to date insight of all devices and software that comprises your IT estate.

- **Gain permanent visibility** of all hardware and software assets, including tablets, smartphones, laptops and Windows, Mac y Linux servers.
- **Automate repetitive tasks**, freeing up time for value-add projects and tasks.

## 100% cloud-based solution

- Protects, manages and supports all devices -anytime, from anywhere- including those in remote offices and laptops.
- No need for additional infrastructure at customer site.
- Simple, central management via a simple Web browser.
- Reduced resource usage: Extremely light agent and reduced bandwidth usage when deploying software and automatically updating the protection.
- Encrypted cloud communication and secure service with the following certifications: ISO.

## Anti-malware security and protection

- Complete anti-malware protection for Windows, Linux and Mac OS X endpoint systems, including servers and laptops.
- Maximum protection with real-time access to Collective Intelligence.
- Heuristic and anti-exploit technologies against new threats that take advantage of unknown vulnerabilities and zero-day attacks
- Advanced tools for rootkit and rogueware detection.
- Firewall (personal or managed).
- Antivirus and anti-spam support for Microsoft Exchange 2007, 2010 and 2013.
- Device control (USB data storage devices, DVD/CDs, modems, Bluetooth devices, etc.).
- Centralized quarantine management.
- Category-based Web filtering and monitoring.
- Remote wipe and password protection against data theft on lost or stolen smartphones and tablets.

## Real-time device inventory and monitoring

- Visibility and control of all devices on the network, including smartphones and tablets.
- Control and monitoring of CPU usage, memory, disk space, services, software, etc.
- Performance graphs and on-screen warnings.
- Software and hardware change logs.
- License management.

## Software and updates deployment (Patch management)

- Discovery of unpatched devices and centralized, automatic patching of operating systems.
- Centralized software installation.

## Remote, automated support

- Non-disruptive access: Remote event logs, command line, task manager, file transfer, registry editor.
- Remote desktop access: Shared access or complete control
- Messaging system for direct communication between users and the IT Department.
- Ticketing system to organize and classify incidents, share troubleshooting procedures and documentation, etc.
- Script creation for automatic troubleshooting.
- Quick task creation.
- Scalable platform, ability to integrate free components.

## Technical requirements

### Web Console

- Internet connection
- Internet Explorer 7.0 or later
- Firefox 3.0 or later
- Google Chrome 2.0 or later

### For workstations and file servers

- Internet connection
- Microsoft Windows XP, Vista, 7, 8, 8.1 (32-bit & 64-bit editions)
- Windows Server 2003, R2, 2008 (32-bit & 64-bit editions)
- Windows Server 2008 R2, 2012 (64-bit editions)
- Apple OS X 10.6, 10.7, 10.8, 10.9
- Ubuntu 12 (32-bit & 64-bit editions)
- Red Hat Enterprise Linux 6.0 (64 bits edition)
- Debian 6.0 Squeeze

### For mobile devices

- iOS 6 or later
- Android 2.3.3 or later

### For Exchange Server

- Microsoft Exchange Server 2003, 2007, 2010 and 2013

### Supports the following virtualization environments:

- VMWare ESX 3.x, 4.x, 5.x
- VMWare Workstation 6.0, 6.5, 7.x, 8.x y 9.x
- Virtual PC 6.x
- Microsoft Hyper-V Server 2008 R2 and 2012 3.0
- Citrix XenDesktop 5.x, XenClient 4.x, XenServer y XenApp 5.x y 6.x
