- Microsoft Visual Studio Team Foundation Server
- Apache Ant
- Maven

BUG TRACKING

- Bugzilla
- Atlassian JIRA
- Microsoft Visual Studio Team Foundation Server

GRC

- RSA Archer GRC

SIEM

- splunk>

WAF

- IMPERVA

Veracode Services Approach

Augment your current service offerings.

About Veracode

Veracode delivers the application security solutions and services today's software-driven world requires. Our unified platform enables organizations to assess and improve the security of applications from inception through production and customer use. So you can confidently innovate with all the web and mobile applications you build, buy and assemble, as well as the components you integrate into your environments.
