

Get an all-in-one voice, data, and internet solution.

Verizon Business Connection fits your business and your budget.

Is your business suffering from outdated technology, unreliable service, and lack of support? If so, Business Connection from Verizon is the right solution to upgrade your business infrastructure. Combine your voice, data, Internet, and equipment for one low monthly fee.

Verizon Business Connection is designed for any size business that wants a cost-effective way to carry voice and data over the same IP network. This service works with existing key or PBX systems and does not require additional investment in costly infrastructure or desktop equipment. Verizon provides a reliable, business-class solution complete with installation and ongoing maintenance.

Verizon business connection features

- Verizon Voice over IP (VoIP) and Internet Services: Reliable, IP-based services backed by strong service level agreements that are ideal for business-critical applications.
- ADTRAN Total Access 924e IP Business Gateway: A reliable, efficient solution for high-speed voice and data connectivity. Provides the ability to prioritize voice traffic and mission-critical applications.
- Verizon installation and maintenance: Provides on-site installation and convenient, ongoing support for the length of your network contract.

Customer benefits

- Cost-effective voice and data convergence
- Flexible bandwidth options available up to 100 Mbps
- Easy migration to VoIP
- Compatible with Verizon-certified IP PBX
- Leverages existing phone system
- Eliminates employee retraining on calling features and functions
- Disaster recovery support—on-campus calling and single-line fail-over
- E-911 emergency calling

Verizon's extensive intelligent IP and wireless network infrastructure can be leveraged to easily provide cost control. Verizon VoIP customers can make calls to any of the following scenarios without incurring additional long distance usage charges:

- Calls from a Verizon Business Connection site to any Verizon Wireless telephone number (U.S. only)
- Calls from a Verizon VoIP site to other Verizon VoIP customers
- Calls from a Verizon Business Connection VoIP site to the Verizon IP Conferencing platform

Which business connection configuration is right for you?

Business connection configuration	Existing phone system	Existing phone network connectivity	Adtran equipment
Business Connection with Analog Handoff	Key System	Analog Trunks or POTS Lines	Total Access 924e
Business Connection with Digital Handoff	PBX	PRI or T1	Total Access 924e
