

## Solutions brief

# Stay open for business with reliable internet.

## Internet Dedicated with Express Connect

### Here's what you get.

- Internet Dedicated Services from 1.5 to 20 Mbps
- Access over Ethernet or T1
- Internet Dedicated with Express Connect, which includes interim 4G LTE wireless access prior to circuit installation (U.S. locations)
- 4G LTE wireless backup data plan with 1 GB monthly data allowance
- Customer premises equipment (CPE) in the form of an integrated access device from ADTRAN, Cisco or Cradlepoint with ongoing maintenance
- Self-service or personal on-site installation

### Get great service and network performance.

Simple self-service router installation makes it easy to get started. You also have the option of personal installation for your CPE with ongoing maintenance.

Verizon operates one of the world's largest, most reliable and most secure global IP networks. This includes 24x7 proactive monitoring and competitive service level agreements (SLAs). We offer the most reliable mobile network in America, according to RootMetrics®.

We offer you two leading networks combined in one convenient package. But in the end, it's the power of the network that matters. With our networks backing your organization, you can better manage the risk of downtime and support your critical business apps. That helps you stay open for business.

### Learn more.

You can't beat the competition if you're not open for business. In this digital world, an Internet connection is crucial. We give you reliable options that keep you connected right from the start.

the unlikely event that your internet service becomes unavailable, your service automatically switches to the Verizon 4G LTE network to keep your business up and running – rain or shine.

### Combine dedicated bandwidth and 4G LTE wireless access to get fast, flexible and convenient business connectivity.

Internet Dedicated with Express Connect uses interim wireless access to quickly turn on your service – typically in only eight business days. With an easy to install router, you can get your mission-critical applications up and running fast. And once your wireline is installed, Internet Dedicated with Express Connect turns into a wireless backup fail-safe solution for your internet connection. So, in

### Get flexible services that help you boost performance and manage risk.

Internet Dedicated Services helps you meet the growing needs of your critical applications with dedicated bandwidth. This means you can support your organization with reliable communications and applications. And Internet Dedicated with Express Connect lets you access critical applications during your wireline installation, helping you jumpstart new revenue. The addition of wireless backup helps make your business continuity plan stronger. It lets you keep critical communications going and gives you service diversity. On top of that, our network's low latency, consistent throughput and high reliability bolster your ability to keep your business up and running.

1. Based on RootMetrics 2015 First Half U.S. National RootScore® Report: January to June 2015 for mobile network performance test results of four mobile networks across all available network types. Results may vary. Award is not endorsement. Visit [RootMetrics.com](http://RootMetrics.com).
