

# A Better Way to Protect M365 from Ransomware and Data Loss

**HYCU Protégé for M365 is a low-effort way to increase average revenue per user, target new audiences, and improve customer loyalty.**

Organizations of all sizes rely on Microsoft 365 (M365) for key business functions. In fact, with more than 300 million users, it's the most popular SaaS business application in the market today. But with so many users and so much critical data, M365 also presents a rich target for cybercriminals, if it's left unprotected.

As an MSP, you have an opportunity to ensure your customers' M365 data is backed up and recoverable, compliant, and protected against ransomware attacks wherever it lives—on-prem or in the cloud.

HYCU Protégé for M365 is a highly secure Data Protection as a Service (DPaaS) solution that is easy to sell and has a simple setup that delivers quick time to value for you your customers.

## A win-win for you and your customers.

**More customers than ever rely on M365 services. With HYCU Protégé, your customers benefit from Data Protection as a Service (DPaaS) that is simple, reliable, and secure.**

### Reduce infrastructure investments and complexity

HYCU Protégé for M365 doesn't require any extra hardware investment. The ease of SaaS and the scalability of the cloud make it simple to start offering this service to your clients and grow with them as their environments scale. With HYCU Protégé, there is no updating software and worrying about scaling up to meet demand.

### Minimize downtime

Keep the most critical business apps for your clients safe from lengthy downtime. When data loss or cyberattacks happen, HYCU Protégé for M365's secure backups and rapid recovery minimize downtime. HYCU Protégé for M365 provides recovery assurance, which gives you and your customers peace of mind.

## FOR CUSTOMERS

PURPOSE-BUILT FOR M365

**100%**

SAAS REDUCES  
INFRASTRUCTURE  
COMPLEXITY

NO DEPLOYMENT,  
MAINTENANCE, OR SIZING

FLEXIBLE BACKUP AND  
RECOVERY OPTIONS

HELPS MINIMIZE DOWNTIME  
AND DATA LOSS

## FOR MSPs

LOW-EFFORT WAY TO INCREASE  
AVERAGE REVENUE PER USER

SAVE TIME WHILE PROVIDING MORE  
VALUE

IMPROVE CUSTOMER LOYALTY

TARGET NEW AUDIENCES IN HIGHLY  
REGULATED INDUSTRIES

ALL WITHOUT MINIMAL UP-FRONT  
INVESTMENTS

### Avoid unexpected data loss

Without M365 backup, unexpected data loss can become permanent data loss. Protect your customers' data and give them total or granular restore capabilities, allowing users to select a date in time to recover what was lost.

**HYCU Protégé for M365 is a low-effort way for you to increase average revenue per user, target new audiences, and increase customer loyalty with minimal up-front investment.**

### Increase revenue per user

Add value for your clients by protecting their critical data in M365 with effortless self-service backup and archiving. It is a simple add-on to any services package and doesn't require any extra overhead on your part.

### Improve customer loyalty

Become an indispensable part of your clients' data protection strategy. Keep their critical business data safe from ransomware and deletion, while also helping them meet compliance goals.

### Target new audiences

HYCU Protégé for M365 has strict security and compliance controls that can help you appeal to highly-regulated industries like finance, healthcare, and government.

## True SaaS-based enterprise-class multi-cloud data protection

**Your customers' expectations for data protection are uncompromising. When you choose HYCU Protégé for M365, you can solve your customers' biggest data protection challenges with ease.**

### Total 360° Protection of M365

---

**Comprehensive Protection:** Instantly protect your emails, SharePoint, OneDrive, OneNote, Groups, Teams and much more.

**Aggressive RPOs for M365:** High-frequency data protection of M365 assets with constant journaling M365 emails adhering to Microsoft best practices.

**Retain Backups Forever:** Leverage unlimited backup retention by default with customizable options for finite retention.

### Flexible Recovery

---

**Granular email recovery:** Recover emails, attachments, contacts, calendars, tasks, with options of bi-directional email migration between M365, Exchange and Gmail.

**Granular file recovery:** Perform granular (files and folders) and full recovery of OneDrive (files), SharePoint (sites), Groups, and Teams.

**Search and recover:** Advanced, yet an intuitive global search and granular recovery option for Emails, OneDrive and SharePoint backups.

## eDiscovery and Compliance

---

**Detailed monitoring:** Detailed audit trail of email backups, searches, downloads, deletion and much more with alerts and notifications.

**Legal and compliance hold:** Suspend email expiration on demand for situations like ad-hoc legal and compliance audit.

**eDiscovery across the board:** Keep constant track of email correspondence and analytics between senders and recipients.

## Security

---

**End to End Encryption:** Supports In-transit and At-rest encryption; TLS 1.2, AES256, FIPS-2 certified Amazon KMS.

**Data protection compliance:** Solution compliant with several standard; HIPAA, GDPR, PDPA (Singapore) and Australia Privacy Act.

**Backup storage compliance:** Backup target is compliant with SOC 1,2 and 3, ISO27001, FedRAMP, FISMA, DIACAP, DOD CSM Levels 1-5, FIPS 140-2.
