# Hitachi Virtual Storage as a Service

## Fast and Flexible Storage Service for Private Cloud

**FIGURE 1. AGILE STORAGE SERVICES WITH CLOUD-BASED SELF-SERVICE CONSOLE.**

### Boost Business Agility and Performance

As IT and storage infrastructure demands grow, so do the challenges for IT departments to manage the infrastructure, maintain service levels and deploy new projects on behalf of the business. New operating models are required to ensure IT delivers services that are dynamic, cost efficient, responsive to the business, yet compliant. As the business grows the ability to consume capacity in a more flexible manner becomes more critical.

Powered by Hitachi Vantara, Virtual Storage as a Service is a complete cloud offering with 99.99% uptime, ease of deployment and simple to control. The service is designed for fast time to deploy helping customers to quickly access infrastructure services and reduce time in complex procurement cycles.

#### Proven

- Always available high performance based on powerful Hitachi technology

#### Elastic

- Cloud consumption service model – pay as you grow
- Predictable performance and billing, on premises or hosted – your choice

#### Agile

- Self-service management console for simplified planning and deployment
- 4-hour service activation

Hitachi Virtual Storage as a Service provides IT leaders the opportunity to create services that are easy to onboard

and use. Business leaders can exceed expectations with accelerated project deployment while reducing risk factors. This allows IT to structure a flexible approach that protects the business from excessive costs. Packaged within a pre-defined and pre-architected model, performance SLA's can be guaranteed and backed with the expertise of Hitachi Vantara and our service delivery teams.

With an always available self-service console that supports end-to-end ordering, delivery and upgrades, employees from midsize organizations and enterprise business units can focus on providing higher quality and flexible solutions. Now they can enhance service levels and improve security while delivering more complex projects within strict budget constraints. Hitachi Virtual Storage as a Service enables the following:

- Provide value-add services and offerings
- Open up new conversations with existing consumers
- Simplify the way technology is procured and delivered
- Deliver a truly financially flexible consumption model with predictive pricing
