

A WEB-BASED WORKSPACE FOR THE MOBILE WORKFORCE

Lenovo Software's Unified Workspace is the classic representation of ingenious simplicity, right down to its single sign-on capability. It streamlines access to the data center and dramatically minimizes maintenance costs and help-desk tickets without compromising security." - Clay Hawk, Regional IT Director, The OM Group

Workspace Aggregation at a Glance

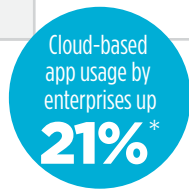

BYOD, the explosion of web-based apps, an increasingly mobile workforce - Lenovo Unified Workspace addresses these challenges while easing the load on IT, increasing employee productivity and decreasing infrastructure costs.

The Struggle is Real

Do these challenges sound familiar?

Workspace aggregation is a must-have to solve problems created by...

Heightened data security needs

Consumerization of IT

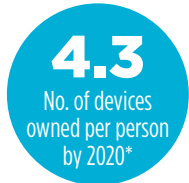

The shift to BYOD

100s of web-based & Windows apps

UNIFIEDWORKSPACE.COM

A WEB-BASED WORKSPACE FOR THE MOBILE WORKFORCE

Why Unified Workspace?

Quick Install
Implemented in a matter of 3-5 days

Complete
All functionality included in the price with no upselling

Isn't it nice when the easiest solution is also the best solution?

Complementary
Enhances existing infrastructure, including Citrix and VMware

Cost Effective
25% of the cost of traditional solutions

Meet end-user needs with one elegant solution

FOR THE END USER

Anytime, Anywhere Access

- Login online – no VPN or VDI needed
- Files, desktop, web-based apps
- Compatible with any device with a browser

Intuitive User Experience

- Consistent user experience across devices
- Customizable with personal web apps
- Browser-based HTML5

Single Sign-On

- SSO to all IT resources (apps, files, and reports)
- Personal webPass allows SSO for public apps
- Credentials encrypted and stored in directory

FOR IT

Streamlined App Delivery

- Private and public web-based apps
- Windows apps via HTML5 webRDP
- Users can add or request their own apps

Two-Tier Security Architecture

- HTTPS connection to files, applications, & reports
- Enhanced, two-factor authentication option

Web Based Reporting Engine

- Connect to any ODBC/JDBC compliant database
- Track app usage to optimize cost of licenses
- Create customizable web-based forms
