THE PROBLEM

Without a secure network, the risk of cyber attacks increases. Sensitive data is exposed, and productivity suffers. Disconnected security doesn’t make analyzing data and working on threats easier.

The solution

The many perks that come with completing Threat-X’s virtual workshop: The team of cybersecurity experts who’ll help you identify threats, work on a real-life scenario, and show you how to stay safe while working remotely.

The ABCs of XDR

Agnostic and Open Engine

Ingest data from any source, scale to any size, and host on any cloud.

Beyond the Endpoint

Ingest data from anywhere and analyze it all to find threats before they reach your endpoints.

Integrate your company

Integrate with cloud, SIEM, SOAR, and your other tools to get a complete view of threats.

Reduce costs and gain control of the data you need.

THE PROBLEM

Should be threats are reading a unfair
