

You've Been Breached: Now What?

1

Stop The Bleeding

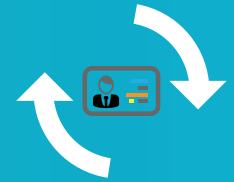

Assemble a breach response team

Check your network segmentation

Update credentials and passwords of users

2

Gauge Your Legal Exposure

Verify the types of information compromised

Health information requires additional considerations

3

Notify, Notify, Notify

Consult with law enforcement

Designate a person for releasing information

Consider offering free credit monitoring

4

Learn From Your Mistakes

Review your information systems

Enroll in a Dark Web Monitoring service

Our Channel-exclusive Dark Web monitoring platform provides the most validated credential exposure data available. Contact us to schedule a demo.
