

# What to expect from your SOC-as-a-Service

Are you experiencing a shrinking IT budget and a shortage of cybersecurity experts? Building and retaining a 24/7 SOC team in-house is possible with SOC-as-a-Service. It's an effective way to combat data breaches without DIY challenges. But there's a catch: SOC-as-a-Service definitions vary, and the provider list is long. So, what should you expect from SOC-as-a-Service?

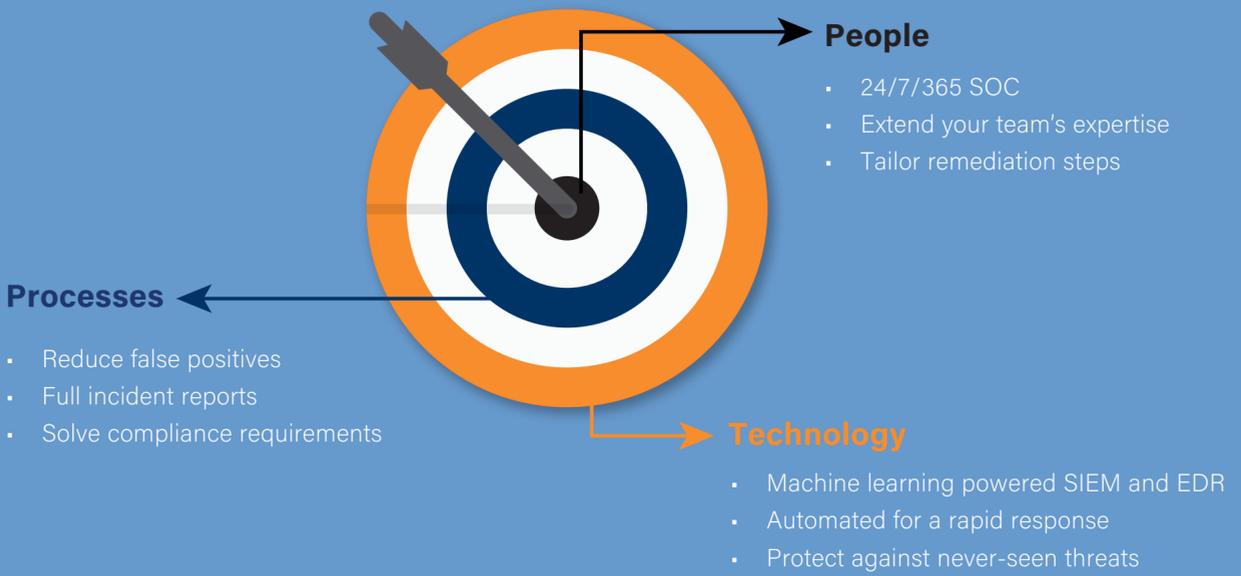

## 1. Capabilities

A layered defense is critical to stop today's multi-pronged threats. SOC-as-a-Service (SOCaaS) is the most cost-effective way to enhance your cybersecurity without the time and expense. Ensure your tech stack offers the following SOCaaS capabilities:

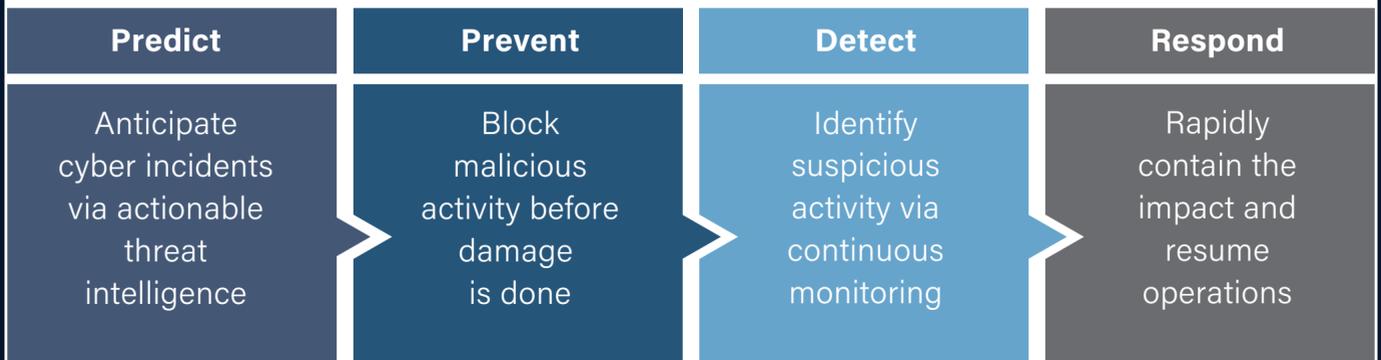

## 2. Components

Technology alone is insufficient. An inflexible cookie-cutter approach also does not address your unique requirements. Ensure your SOCaaS integrates all three components of a successful managed security solution:

## 3. Results

Attackers are evolving their tradecraft, and so should you. Ultimately, SOC-as-a-Service must provide the outcome you need to predict, prevent, detect, and respond to advanced threats. Ensure your SOCaaS produces effective results across these four areas:

## The EventTracker SOC-as-a-Service Advantage

Your security strategy needs to cover your risk tolerance, environment and users, and business-critical data. We provide the comprehensive protection you need against today's relentless attackers. Get the targeted, tailored protection you need for SOC-as-a-Service without breaking the bank.

Protect against cyber threats

Enhance operational efficiency

Simplify compliance and audit readiness

Cut detection and mitigation costs
