

Works for Business[®]

Join the Sprint Partner Program and sell Business Solutions

Sprint Business has a portfolio of industry-leading solutions targeted to help customers of all sizes. Join the Sprint Partner Program to take advantage of our offering and work with us to sell converged solutions.

SD-WAN – Manage the entire WAN through software – improving visibility, simplifying admin, and allowing central management and distribution of business policies to all WAN-edge devices.

5G – Prepare for the future. With more mobile broadband spectrum than any other carrier in the U.S., Sprint is advancing in the race for 5G! We'll launch 5G in 6 major markets in early 2019.

Internet of Things (IoT) – Build connections for the technology that drives business. Connect vehicles, monitor assets, drive mobile commerce, automate IT, protect employees and build smarter cities.

MPLS – Converge email, internet, voice and video from separate networks onto a single platform with enhanced features, high-level performance, wide geographical coverage and an exceptional end user experience.

Security – Prepare for cyber security incidents before they strike and enforce mobility security with solutions to safeguard organizations from known and emerging cyber threats.

Smart UC – Get the tools employees need to collaborate. From video conferencing to real-time collaborative documents, Sprint Business has a suite of tools to help increase productivity.

MultiLine – Keep business and personal phone lines separate by easily deploying and controlling dedicated business numbers on employees' own personal mobile phones.
