Accelerate innovation with modern applications

Modern applications are the key to success

- 90% of new enterprise applications will be developed using cloud-native approaches by 2023.
- 70% of enterprises plan to have a cloud-first, Automation, and multi-cloud management processes, tools, and staffing by 2022.
- 500M digital apps and services will be developed using cloud-native approaches by 2021.

Demonstrate the benefits of adopting modern applications

- Enhance both traditional and cloud-native applications
- Automate to innovate
- Leverage existing investments
- Architect for consistency

Without Dell Technologies Cloud

- Slow and complex configuration
- Inconsistent infrastructure and operations
- Risk of obsolete infrastructure
- Skills gaps and increased costs

With Dell Technologies Cloud

- Fast stand-up of turnkey solutions
- Secure, up-to-date environment
- Add cloud-native capabilities incrementally
- Streamlined hybrid cloud consistency

Help customers add containers to their DevOps workflow quickly and easily with Kubernetes on Dell Technologies Cloud

Enable organizations to accelerate the deployment of modern applications with the Dell Technologies Cloud platform.

- Help customers add containers to their DevOps workflow quickly and easily with Kubernetes on Dell Technologies Cloud.
- Enable organizations to automate the deployment of modern application infrastructure with VMware Cloud Foundation to provide a production-ready Kubernetes environment. Your customers can develop and deploy modern applications quickly, leveraging existing skillsets.
