Today’s digital-first customers demand a digital-first customer experience – connecting with the brands that serve them wherever and whenever they want. In fact, 9 out of 10 customers expect consistent interactions across channels. Brands today need to adopt an effective digital engagement strategy or risk obsolescence.

Comm100 offers an enterprise-grade, AI-powered digital customer experience platform that helps your customers deliver a higher standard of care and support across every digital channel: live chat, chatbot, social media, email, messaging, and self-serve knowledge base.

**Partner with us**

Whether you’re motivated by an additional revenue stream or by the desire to simply deliver more value to your customers, we’ll make it easy.
Why Comm100?

**Flexible**
Configure Comm100 to work the way your customers want, across web and mobile properties
Agent access via desktop, browser, and mobile app on iOS and Android

**Scalable**
Cloud architecture supporting thousands of concurrent agents, serving the needs of even the largest contact centers
Start with a single channel and grow into a true omnichannel digital CX deployment at a pace that suits your customer's needs

**Reliable**
Only Comm100 offers guaranteed uptime with our MaximumOn™ failover technology. Because customer experience should never be offline

**Secure**
Comm100 puts security first, adhering to a wide range of standards including ISO 27001, HIPAA, PCI-DSS, GDPR, WCAG 2.0, and others
Built-in security and privacy capabilities that satisfy even the strictest requirements: SSO, IP restrictions, TLS encryption, data masking, granular password policies, and more.

**Intuitive, efficient interface**
Unified agent console: One centralized interface for managing conversations on every channel
Intuitive UI: Get agents up and running in hours, not days

**Integrated**
Our robust API, agent console extensions, Zapier layer, and many more integration tools help you connect to hundreds of other applications in your customers' ecosystems to streamline workflows, improve productivity, and gain deep insight into their digital CX engagements.
