

Address business risk with managed services powered by Commvault

Data can reveal insights, drive innovation, and take companies in exciting new directions. However, today's data sprawl introduces a number of risks and challenges that are preventing businesses from running efficiently and stalling the ability to thrive and grow. The challenges with data sprawl, increased threat of cyberattack, and the adoption of hybrid cloud environments form a business integrity gap; a gap between where organizations' data environments are today and where they should be to thrive, accelerate growth and digitally transform.

Commvault intelligent data services enable you to proactively simplify, manage, and comprehensively protect the continuously evolving and growing data environments for your customers. When their very existence depends on data, Commvault can help you become the focal point to ensuring the integrity of your customers' business.

With Commvault, you can meet these challenges for your customers with the Intelligent Data Services platform, closing the business integrity gap and enabling organizations to execute on their digital transformation strategy and accelerate business growth.

5 reasons to partner with Commvault

1 New revenue streams

Go beyond backup and deliver complete data management services. Build additional services with a single partner who provides intelligent data services that make managing data simple, secure and scalable.

2 Active, aligned partnerships

Commvault supports the technologies and cloud provider platforms that customers rely on and service providers build on, including Microsoft, Amazon, Oracle, SAP, Google and ServiceNow, just to name a few.

3 Flexible licensing options

Commvault® Service Provider Licensing is packaged for easy consumption and reduced total cost of ownership (TCO). Utility and subscription contract options add savings and flexibility.

4 Manage customers' data, your way

Cloud-first with infinite scalability, Commvault's data management solutions allow you to manage customer data, your way, including modern deployment options, contactless capabilities, and a unified management experience.

5 Tech that scores big marks

Consistently recognized as a leader by industry experts and analysts, including Gartner and Forrester, for completeness of vision, ability to execute, and data resiliency, you can be confident selling Commvault.

Are you ready to accelerate your business with Commvault?

50%

of partners say that the business risk of not providing cloud-based managed services was a key driver behind the decision to offer them.

41%

of organizations say best-of-breed is the most common strategy for developing cloud-based managed service vendor relationships.

By 2023 partners expect **66%** of their revenue to come from managed services.
