

▶ Alliance Overview: Commvault and Cisco

Commvault and Cisco provide pre-tested and validated data protection solutions that mitigate risk and accelerate deployment, reducing the time to value and streamlining management and support for your data protection initiatives.

With our joint data protection solutions, you can eliminate backup silos, realize better economics, scale with speed and ease and accelerate your journey to the cloud.

Our Accolades

Cisco brings more than 30 years of IT leadership, vision and breadth to the table.

Commvault has been named as a leader on the Gartner Magic Quadrant for Data Center Backup and Recovery Software for six straight years—and was recognized for “completeness of vision” and “ability to execute” in 2016.

Cisco

Provides IT infrastructure solutions, such as Cisco Unified Computing System (UCS) and Cisco HyperFlex Systems, and converged infrastructures, such as FlashStack, that enable automation, orchestration, integration and more.

Commvault

Helps you analyze, backup, recover, replicate, archive and search data across all storage types.

Challenges Solved

- Need for comprehensive data protection that reduces costs and risks amongst large amounts of data and varying data platforms
- Pressure to reduce operational overhead and ensure efficient operations and IT capital outlays
- Requirement for always-on business operations

Benefits

- **42-52% reduction** in annual spending on data infrastructure, software, services and compliance
- **47-62% reduction** in weekly administrative hours across cloud, disaster recovery, backup, snapshots, discovery, reporting and scripts
- **15-30% reduction** in data management point solutions
- **55% reduction** in annual unplanned downtime
- **67-87% improvement** in average recovery time for messages, files and VMs as well as Exchange, Oracle, SharePoint and SQL
- **66-217% improvement** in data coverage for protection, analytics, encryption and reporting
- **63-73% reduction** in annual exposure to compliance failures, audit failures and/or data theft or breach
