

► Partnership Overview: Commvault and Hitachi

Commvault and Hitachi provide simplified, reliable data protection and recovery for the Hitachi Global-Active Device (GAD) and Hitachi Unified Compute Platform (UCP) via a joint solution called Hitachi Data Protection Suite powered by Commvault.

Hitachi Data Protection Suite (HDPS) powered by Commvault® software automates data protection and management for unified storage as well as virtualized and cloud infrastructures.

Together, we help enterprise organizations meet their high availability, recovery point and recovery time objectives for solutions such as Hitachi GAD and Hitachi storage platforms.

Hitachi

Provides storage infrastructure and storage management and backup software such as Hitachi GAD, Hitachi Content Platform (HCP) and UCP.

Commvault

Provides additional software functionality to help customers analyze, backup, recover, replicate, archive and search data across all storage types.

Our Accolades

Hitachi Data Systems has been named a TechTarget finalist in the 2015 Products of the Year enterprise storage system software category and received the TMC 2015 Cloud Computing Excellence Award and the 2014-2015 Cloud Award for Best in Mobile Solutions category.

Commvault has been named a Leader on the Gartner Magic Quadrant for Data Backup and Recovery Software for six straight years—and was recognized for “completeness of vision” and “ability to execute” in 2016.

Challenges Solved

- Protect, manage and access the information you need with a heterogeneous data protection solution.
- A single interface manages data at a fraction of the time, effort and cost required by separate point products.
- Simplify data management in complex networked storage environments with a consistent way to locate and manage data and applications.
- Protect hundreds of virtual machines and scale to thousands of virtual machines and servers with automated, policy-driven capabilities.

Benefits

- **Reduce administrative overhead up to 80%**
Key capabilities are built on a common code base and share a common management console, dramatically simplifying administrative processes.
- **Reduce your disaster recovery costs**
Advanced disaster recovery services allow you to reduce costs and recovery times, and quickly deploy business-continuity plans.
- **Reduce annual support costs up to 35%**
Manage data protection and retention as a service for tens of thousands of workers, all from one easy-to-manage platform.
- **Lower your total cost of ownership**
Reduce administrative time and training and gain better capacity utilization when compared to point solutions.
